Blitz Tetraploid Perennial Ryegrass

High feed quality for better stock health

For more information on
this mix please go to
www.specseed.co.nz

- Blitz tetraploid perennial ryegrass is a great product with all the high feed qualities typical of tetraploid ryegrasses.
- Blitz is highly palatable, ensuring excellent animal performance, typically as a 3-5 year pasture option.
- Blitz is a medium tillered cultivar making it compatible with white clover.
- Blitz is a late flowering type retaining its leaf quality longer into the late spring / summer.
- Performs best in medium/high fertility soils in areas with reliable summer moisture levels.
- Suitable for all stock types and boasts good disease resistance.
